### **More about the Job Description and J.P. Morgan's Global Research Center**

J.P. Morgan's Global Research Center (GRC) in Mumbai was set up in August 2003 as an extension of the firm's global equity research teams around the world. Since its inception GRC has grown steadily and the team of analysts has expanded to provide coverage for the key sectors globally. Besides working with J.P. Morgan's equity research teams, the analysts in GRC are now also engaged with other areas of public side research including Fixed Income, Asset Allocation, Derivatives and indices.

J.P. Morgan's Global Research Center (GRC) provides a challenging work environment and excellent opportunities to learn and grow both at the GRC and in the firm's global network.

The main responsibilities as a C.A. Industrial Trainee will include:

- Gathering and analyzing data from a variety of sources, including company reports, the internet, online databases and JP Morgan proprietary content.
- Building, maintaining and analyzing financial models of companies and industries; generating regular and one-off reports, graphs and datasets from these models, using a standard JPMorgan model format.
- Writing content (text, tables and charts) for company and industry reports and presentations to be used internally and published externally by colleagues in other parts of global research.
- Maintaining regular contact with colleagues in the global sectors, taking part in conference calls and responding to project requests (often client-generated).

Essential skills required:

- Keen interest in financial markets
- Strong quantitative skills
- Analytical aptitude and ability to learn financial concepts
- Good knowledge of MS Excel, use of internet and standard MS Office suite
- Good communication and team skills
- Close attention to detail and ability to work to very high standards
- A strong motivation to learn and manage projects independently
- Passion for and interest in corporate analysis
